PRESS RELEASE #11

Policy Recommendations to Improve Children's Mental Health Support

They will focus on strengthening cooperation between families, schools, community organisations and policymakers in order to create more effective support networks for children.

One of the key outcomes of the HMHC project will be the development of policy recommendations aimed at improving support systems for children's mental health. The recommendations will be based on research findings and practical experiences gathered during the project.

These recommendations will be shared with decision-makers at local, national and European levels.
